Primary Colours should be used as full background colours. The neutral colours should be used for text. The accent colours should be used sparingly to call attention to things

Typography

Pontano Sans

Light
Regular
Medium
SemiBold
Bold

The SME's Shield

Aegis is an invoicing platform that helps small business owners and the accountants who serve them with invoicing and compliance. This is driven by the compliance mandate from the NRS that says that business invoices should be linked with their system by 2027 (for SMEs)

Pontano bold and semibold should be used heading fonts. Medium should be used for titles and subheadings. Regular and Light should be used as body fonts
